Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. " Dr. Phil, " along with George Iny and the Editors of the Automobile Protection Association, pull no punches.

Standing, as it does, at the intersection of the information, computer, social and behavioral sciences and healthcare, and dealing with the resources, devices and methods required to optimize the acquisition, storage, retrieval and use of information in health and biomedicine, nursing informatics is increasingly crucial in modern healthcare. This book presents selected papers from the Twelfth Nursing Informatics Congress (NI2014), held in Taipei, Taiwan in June 2014, and entitled 'East meets West eSMART+'. The aim of the congress is to provide a single, high-profile, internationally renowned forum for research in the theory and practice of nursing informatics. The comprehensive scientific program focuses on mobile and web technologies with healthcare delivery applications, as well as currently relevant core topics including patient safety and quality, data information management, usability, meaningful use and educating for competencies. Containing 68 papers selected from the 280 presentations by delegates from more than 30 countries, the book presents an overview of current research and practice which will be of interest to all those whose healthcare role involves the use of modern information technology.

Malcolm Allison is one of the most controversial figures of the last half-century of English football. Leader of the famed 'West Ham Academy', his playing career was cut short by the loss of a lung to tuberculosis. Disillusioned, he became a professional gambler before acknowledging that football was his calling. After humble beginnings as a coach, he began a celebrated partnership with Joe Mercer, turning Manchester City into one of the most stylish teams English football has produced. Along with the trophies came the birth of Big Mal, the larger-than-life personality who helped revolutionise televised football. He became instantly recognisable for his cigar and Fedora, and equally notorious for a string of affairs with beautiful women. As the dark side of Big Mal took over, he was banned for life from the touchlines, became embroiled in a series of boardroom battles and spent time in police cells and rehabilitation clinics fighting the effects of alcoholism. Yet despite the often-destructive effect of his Big Mal persona, Malcolm Allison retains his status as one of the most incisive minds to have graced the game. This book tells both sides of the story, tracing the life and times of one of the most charismatic characters in British sport.

The Direction of Trade Statistics Online service provides data on the value of merchandise exports and imports between each country and all its trading partners. The database includes: total bilateral and multilateral exports and imports aggregated at national or regional group level; data from 1948 at monthly, quarterly, and annual frequencies.

This book constitutes the best papers selection from the proceedings of the 13th International Conference on Intelligent Software Methodologies, Tools and Techniques, SoMeT 2014, held in Langkawi, Malaysia, in September 2014. The 27 full papers presented were carefully reviewed, thoroughly revised or enlarged, and selected as best papers from the 79 published proceedings papers, which had originally been selected from 192 submissions. The papers are organized in topical sections on artificial intelligence techniques in software engineering; requirement engineering, high-assurance system; intelligent software systems design; creative and arts in interactive software design; software methodologies for reliable software design; software quality and assessment for business enterprise; software analysis and performance model; software applications systems.

This volume gathers the latest advances, innovations, and applications in the field of mining, geology and geo-spatial technologies, as presented by leading researchers and engineers at the International Conference on Innovations for Sustainable and Responsible Mining (ISRM), held in Hanoi, Vietnam on October 15-17 2020. The contributions cover a diverse range of topics, including mining technology, drilling and blasting engineering, tunneling and geotechnical applications, mineral processing, mine management and economy, environmental risk assessment and management, mining and local development, mined land rehabilitation, water management and hydrogeology, regional Geology and tectonics, spatial engineering for monitoring natural resources and environment change, GIS and remote sensing for natural disaster monitoring, risk mapping and revisualization, natural resources monitoring and management, mine occupational safety and health. Selected by means of a rigorous peer-review process, they will spur novel research directions and foster future multidisciplinary collaborations.

Rooted in the creative success of over 30 years of supermarket tabloid publishing, the Weekly World News has been the world's only reliable news source since 1979. The online hub www.weeklyworldnews.com is a leading entertainment news site.

Municipal solid waste (MSW) disposal is an ever-increasing problem in many parts of the world, especially in developing countries. To date, landfilling is still the preferred option for the disposal and management of MSW due to its low-cost operation. While this solution is advantageous from a cost perspective, it introduces a high level of potential pollutants which can be detrimental to the local environment. Control and Treatment of Landfill Leachate for Sanitary Waste Disposal presents research-based insights and solutions for the proper management and treatment of landfill leachate. Highlighting relevant topics on emerging technologies and treatment innovations for minimizing the environmental hazards of waste disposal, this innovative publication contributes to filling in many of the gaps that exist in the current literature available on leachate treatment. Waste authorities, solid waste management companies, landfill operators, legislators, environmentalists, graduate students, and researchers will find this publication beneficial to their professional and academic interests in the area of waste treatment and management.
