Introducing a NEW addition to our growing library of computer science titles, Algorithm Design and Applications, by Michael T. Goodrich & Roberto Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement.

Why do we forget about people when we talk about innovation? Innovation has been a popular subject for the last years. Bruce Nussbaum, perhaps exaggerating, said "Innovation died in 2008, killed off by overuse, misuse, narrowness, incrementalism and failure to evolve. It was done by CEOs, consultants, marketers, advertisers and business journalists who degraded and devalued the idea by conflating it with change, technology, design, globalization, trendiness, and anything new. It was done by an obsession with measurement, metrics and maths and a demand for predictability in an unpredictable world." If so, why another book on innovation? Because it is not one more book on the subject! It is a book that does not talk about innovation, but about people. Is there anything as important as people when innovating? This book describes how to create a true culture of innovation, a culture where innovation is not an objective, but a consequence.

We should thank a pollinator at every meal. These diminutive creatures fertilize a third of the crops we eat. Yet half of the 200,000 species of pollinators are threatened. Birds, bats, insects, and many other pollinators are disappearing, putting our entire food supply in jeopardy. Protecting Pollinators breaks down the latest science on environmental threats and takes readers inside the most promising conservation efforts. Efforts range from cities creating butterfly highways to citizen scientists monitoring migration. Along with inspiring stories of revival and lessons from failed projects, readers will find practical tips to get involved. And they will be reminded of the magic of pollinators—the iconic monarchs, dainty hummingbirds, and homely bats alike who bring food to our tables.

Do your desires have you going around in circles? You may be looking for fulfillment in all the wrong places. You vowed you'd never repeat the same mistakes—yet you find yourself right where you started. What is it that keeps drawing you back into the same old traps? The fact is, your longings are built from the blueprint of your needs: for protection, for love, for God. And those needs aren't going anywhere. Sheila speaks candidly about the trials in her life, including the heartache of her first marriage, and intertwines her story with the biblical saga of King David. As both Sheila's and David's stories make clear, some cravings are misguided, but they all stem from the same hunger—and they will haunt you until that hunger gets satisfied properly. If you keep reaching out to the wrong people at the wrong times in your own life, The Longing in Me will help you understand that your cravings are not the problem. It's where they lead you that makes all the difference.

The Rank Wars is racing towards a conclusion as the final squads battle to determine their final rankings. Katori is as difficult to deal with as ever, and her squadmate Wakamura is having none of it. But mid fight, Katori suddenly tells Wakamura that he gets to call all of the shots. Will Wakamura be able to handle the pressure? And with the Rank Wars over, the Away Team selection exams are on the horizon. But first, Jin and Rindo need to have a little chat with a handful of familiar Neighbor invaders from Galopoula...about Yotaro. -- VIZ Media
