IFSTA Aircraft Rescue and Fire Fighting manual and the FAA Aircraft Rescue and Firefighter Training CBT discusses that hot brakes should be allowed to cool naturally. If housekeeping wise, wheel-bearing grease, hydraulic fluid and/or the tires themselves catch fire, then the use of AFFF to cool while extinguishing fire is highly recommended.

Aircraft Rescue and Fire Fighting System (ARFF)

This course is based on NFPA 1002: Standard for Fire Apparatus Driver/Operator Professional Qualifications. The course is designed for fire apparatus drivers who will be operating a fire department emergency vehicle intended to carry rescue and firefighting equipment used for rescuing occupants and combating fires in aircraft at, or in the vicinity of, an airport.

Fire Service Technical Search and Rescue, 8th Edition is a primary training text for Level I Rescuers according to NFPA® 1006. The manual presents the knowledge and skills for fire service search and technical rescue for Level I Rescuers to safely and effectively conduct Operations-level rescues as defined in NFPA® 1006. The book also supports the corresponding chapters of NFPA® 1670, Standard on Operations and Training for Technical Search and Rescue Incidents (2014 Edition). According to NFPA® 1670, an Operations Level Rescuer is able to participate in more complex search and rescue incidents under the supervision of a Rescue Technician. This NEW training manual focuses on Operations-level situations most common for firefighters and rescue squad members. Technician-level information has been included to provide Operations-level fire/rescue personnel with the background information needed to effectively support complex technical rescue operations. A firefighter or rescue squad member will find the knowledge and skills in this manual, to safely and effectively perform basic search and rescue operations under appropriate supervision. Curriculum USB Flash Drive is now available. This customizable curriculum includes lesson plans for the instructor complete with learning objectives, lesson outlines and assignment sheets. PowerPoint® visuals, skill sheets, quizzes and clip art are also included in the curriculum.

Part I: Getting started - the rescue company and its people What resue is about Recruiting and staffing Rescue apparatus Tools and equipment State-of-the-art equipment Training Part II: Rescue incidents Impalement Operating on air Buried victims Elevators Airbags Utilizing the rescue company Water rescue teams Confined space Vehicle accidents Part III: Operations and planning Rescue operational plan Rope and rigging Treating victims Concrete Planning for major operations.

This version includes all 21 chapters of Essentials of Fire Fighting, 6th Edition and adds three chapters written and validated to meet the emergency medical and hazardous materials requirements of NFPA® 1001, 2013 Edition. Chapter 22 specifically addresses the Firefighter I and Firefighter II knowledge and skills requirements for the emergency medical care competencies identified in NFPA® 1001, 2013 Edition Chapter 4. Chapters 23 and 24 meet the First Responder Awareness and Operations Levels for Responders according to NFPA® 472: Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents, 2012 Edition and OSHA 1910.120. The chapters also provide validated content to meet Section 6.6, Mission-Specific Competencies: Product Control, of NFPA® 472. The hazardous materials information is adapted from the IFSTA Hazardous Materials for First Responders, 4th Edition.

Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness, response, & short-term recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations.

This report is a guidebook that will assist individuals at airports who would like to enter into formal or informal mutual aid agreements with other airports in the event of a community-wide disaster (e.g., hurricane, earthquakes) that requires support and assistance beyond their own capabilities. The guidebook describes the benefits that an airport-to-airport mutual aid program (MAP) can provide. It outlines the different considerations when setting up an airport-to-airport MAP and has many examples, including examples from other industries--
