Atlas Copco Compressor Store We supply air compressors from 2-50HP, providing compressed air flows up to 250 CFM, with and without dryers, directly from Atlas Copco.

Please note: this book was written and published prior to Manning's identification as Chelsea. Beginning in early 2010, Chelsea Manning leaked an astounding amount of classified information to the whistleblower website WikiLeaks: classified combat videos as well as tens of thousands of documents from the war in Afghanistan, hundreds of thousands from Iraq, and hundreds of thousands more from embassies around the globe. Almost all of WikiLeaks's headline-making releases of information have come from one source, and one source only: Chelsea Manning. Manning's story is one of global significance, yet she remains an enigma. Now, for the first time, the full truth is told about a woman who, at the age of only twenty-two, changed the world. Though the overarching narrative in media reports on Manning explain her leaks as motivated by the basest, most self-serving intentions, Private paints a far more nuanced, textured portrait of a woman haunted by demons and driven by hope, forced into an ethically fraught situation by a dysfunctional military bureaucracy. Relying on numerous conversations with those who know Manning best, this book displays how Manning's precocious intellect provided fertile ground for her sense of her own intellectual and moral superiority. It relates how a bright kid from middle America signed on to serve her country and found herself serving a cause far more sinister. And it explains what it takes for a person to betray her orders and fellow troops—and her own future—in order to fulfill what she sees as a higher purpose. Manning's court-martial may be the military trial of the decade, if not the century. This book is a must-read for anyone who wants to understand the woman behind it all.

This is the first comprehensive introduction to the concepts, theories, and applications of pricing and revenue optimization. From the initial success of "yield management" in the commercial airline industry down to more recent successes of markdown management and dynamic pricing, the application of mathematical analysis to optimize pricing has become increasingly important across many different industries. But, since pricing and revenue optimization has involved the use of sophisticated mathematical techniques, the topic has remained largely inaccessible to students and the typical manager. With methods proven in the MBA courses taught by the author at Columbia and Stanford Business Schools, this book presents the basic concepts of pricing and revenue optimization in a form accessible to MBA students, MS students, and advanced undergraduates. In addition, managers will find the practical approach to the issue of pricing and revenue optimization invaluable. Solutions to the end-of-chapter exercises are available to instructors who are using this book in their courses. For access to the solutions manual, please contact marketing@www.sup.org.

Tatum Everley is a freshman at Western Michigan University. Due to an emotionally and psychologically abusive past relationship, Tate struggles from Complex-Post Traumatic Stress Disorder. She has been working on controlling her symptoms and flashbacks, but when she meets Axel Burne at a fraternity party, who is notorious for sleeping around and getting into fights, she tries her best to dodge the bullet. Axel starts to become intrigued by Tate, but she's better off choosing Lucas- the sweet guy who has been trying to take her out since orientation. But even though Lucas is the better option, Axel keeps reappearing. Tate continues to try to stay away from him, but it starts becoming harder to, and as she gets closer to him, things start to get way out of hand. If Tate wants her happy ending and her sanity intact, then she has to push through the hardships and maintain control over her disorder.

Hungry? Need lunch? Want the perfect food to impress your girlfriend? Then you need to see Matt, because Matt has an amazing talent. It's called ... Tuckshop.Matt a.k.a. 'The Tuckshop Kid' is back! And he's smaller than ever! He's lost weight, is sort-of enjoying exercise and is going out with the perfect girl, Kayla, who loves food as much as he does. He can hardly believe his luck. But when Matt uncovers Kayla's secret, he realizes that no one is perfect and sometimes problems can take on a life of their own. From the author of the award-winning book The Tuckshop Kid comes the companion adventure about food, friendship and finding your way.

Winner of the Pulitzer Prize for Explanatory Reporting In this Pulitzer Prize-winning collection, Washington Post reporter Eli Saslow traveled across the country over the course of a year—from Florida and Texas to Rhode Island and Tennessee—to examine the personal and political implications and repercussions of America's growing food stamp program. Saslow shows us the extraordinary impact the arrival of food stamps has each month on a small town's struggling economy, the difficult choices our representatives face in implementing this \$78-billion program affecting millions of Americans, and the challenges American families, senior citizens, and children encounter every day in ensuring they have enough, and sometimes even anything to eat. These unsettling and eye-opening stories make for required reading, providing nuance and understanding to the complex matters of American poverty. An eBook short.

This volume culls the most important and provocative research and policy analysis in the child welfare field and is an essential guide for understanding the burgeoning field of children's services.

An extensive critical compilation of the wide range of manufacturing processes that involve the application of spray technology, this book covers design of atomizers as well as the performance of plant and their corresponding spray systems. The needs of practising engineers from different disciplines: project managers, and works, maintenance and design engineers are catered for. Of interest to researchers in the field of liquid sprays, the book includes outlines of the contemporary and possible future research and challenges in the different fields of application and deals with: □ sprays and their production; □ sprays in industrial production processes; □ processes involving vapourisation and cooling or cleaning of gases; □ spray-surface impact processes; □ fuel sprays for fixed plant; □ spraying of hot surfaces for steel making and other metals; □ spraying of molten metals. Guidance is given for the analysis and interpretation of experimental data obtained using different measurement techniques.
