"In a searing indictment of America's decline, former New York Times columnist Bob Herbert profiles struggling Americans--casualties of decades of government policies that have produced underemployment, inequality, and pointless wars--and offers a ringing call to arms to restore justice and the American dream. The United States needs to be reimagined. Once described by Lincoln as the last best hope on earth, the country seemed on the verge of fulfilling its immense promise in the mid 1960s and early 1970s: unemployment was low, wages and profits were high, and the nation's wealth--by today's standards--was distributed in a remarkably equitable fashion. America was a society confident that it could bring a middle-class standard of living (at the very least) and the full rights of citizenship to virtually everyone. This sense of possibility has evaporated. In this book longtime New York Times columnist Bob Herbert combines devastating stories of suffering Americans with keen political analysis to show where decades of corporate greed, political apathy, and short-term thinking have led: America's infrastructure is crumbling, our schools fail our children, unnecessary wars maim our young men, and underemployment plagues a generation. He traces how the United States went wrong, exposing the slow, dangerous shift of political influence from the working population in the 1960s to the corporate and financial elite today, who act largely in their own self-interest. But the situation isn't entirely hopeless. Herbert argues that by tapping the creative ideas of people across the country who are implementing solutions at the local level, the middle class can reassert its power, put the economy back on track, and usher in a new progressive era"--

After his car took a hundred-foot nosedive during the collapse of the 35W bridge in Minneapolis, Garret Ebling was left with serious physical and emotional injuries, but his focus on hope allowed him to recover and regain his life.

Placing climate change within the long histories of enslavement, settler colonialism, and resistance, *Climate Change, Literature, and Environmental Justice: Poetics of Dissent and Repair* examines the connections between climate disruption and white supremacy. Drawing on decolonial and reparative theories, Janet Fiskio focuses on expressive cultures and practices, such as dance, protests, and cooking, in conversation with texts by Kazim Ali, Octavia Butler, Louise Erdrich, Winona LaDuke, Mark

Nowak, Simon Ortiz, Jesmyn Ward, and Colson Whitehead. Through an exploration of speculative pasts and futures, practices of dissent and mourning, and everyday inhabitation and social care, *Climate Change, Literature, and Environmental Justice* illuminates the ways that frontline communities resist environmental racism while protecting and repairing the world.

LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today's people and events. They have free access to share, print and post images for personal use.

More than 12 years have passed since the publication of the first edition of *Crisis and Emergency Management*. During that time numerous disasters—from 9/11 to massive earthquakes in Iran and China, to the giant Asian Tsunami, Hurricane Katrina, and the Fukushima Tsunami and ensuing nuclear meltdown—have changed the way we manage catastrophic events. With contributions from leading experts, this second edition features 40 new chapters that address recent worldwide crises and what we have learned from emergency responses to them. See What's New in the Second Edition: Up-to-date concepts, theories, and practices Analysis of recent disasters and their effect on emergency management Policy and managerial lessons Suggestions for capacity building in crisis and emergency management The book covers a wide range of international issues using critical, empirical, and quantitative analyses. It discusses various approaches to topics such as resolving political tension and terrorism issues, the potential use of biological weapons, and the role of public relations in crisis. The author offers insight into organizational and community resiliency development; a "surprise management" theory in practice for upgrading the knowledge and skills in managing crises and governing emergencies; and better and more effective organizational, political, social, and managerial coordination in the processes. He presents case studies that enhance and advance the future theory and practice of crisis and emergency management, while at the same time providing practical advice that can be put to use immediately. Managing crises and governing emergencies in such an age of challenges demands a different kind of knowledge, skills, and attitudes that were not available yesterday. This book gives you valuable information with applications at the macro, micro, organizational, and interorganizational levels, preparing you for emergency management in an increasingly globalized and uncertain world.

"Matthew Stein's comprehensive guide to sustainable living skills gives you the tools you need to fend for yourself and your family in times of emergency or disaster. It also goes a step further, giving sound instructions on how to become self-reliant in seemingly stable times and for the long term by adopting a sustainable lifestyle"--Cover, p. 4.

Danger...deception...desire! Emergency physician Neil Fletcher didn't expect to see Kelly Drummond ever again, let alone attend an Urban Search and Rescue course with her. She abandoned him at the worst time of his life—and he's never been able to forgive her...or forget her. Then disaster strikes when a shopping mall collapses, and the USAR team is needed. Working together to save lives, Kelly and Fletch have to confront the truth about the past—about the secret Kelly has kept for so long—and about a passion neither can resist!

The incredible stories of twenty-two lone survivors of maritime disasters are presented in this collection of war and peacetime incidents. The dramatic accounts—including those of a British sailor who survived 133 days at sea on an open raft and a German sailor who spent 28 hours in the ocean without a life preserver—are based on a wide array of sources, including interviews with the survivors and their families and official records to back up their accuracy. Most took place in World War II, when the navies and merchant fleets of many nations roamed the seas. Each story is one of boundless courage, a tenacious will to survive, and, in many cases, good luck.
