Critical Social Theory and the End of Work examines the development and sociological significance of the idea that work is being eliminated through the use of advanced production technology. Granter's engagement with the work of key American and European figures such as Marx, Marcuse, Gorz, Habermas and Negri, focuses his arguments for the abolition of labour as a response to the current socio-historical changes affecting our work ethic and consumer ideology. By combining history of ideas with social theory, this book considers how the 'end of work' thesis has developed and has been critically implemented in the analysis of modern society. This book will appeal to scholars of sociology, history of ideas, social and cultural theory as well as those working in the fields of critical

management and sociology of work.

In this accomplished, sophisticated and up-to-date account of the state of critical social theory today, Craig Browne explores the key concepts in critical theory (like critique, ideology, and alienation), and crucially, goes on to relate them to major contemporary developments such as globalization, social conflict and neo-liberal capitalism. Critical theory here is not solely the work of Adorno, Horkheimer, Marcuse and Habermas. The book begins with the Frankfurt School but uses this as a base to then explore more contemporary figures such as: Nancy Fraser Axel Honneth Luc Boltanski Cornelius Castoriadis Ulrich Beck Anthony Giddens Pierre Bourdieu Hannah Arendt A survey of critical social theory for our times, this is an essential guide for students wishing to grasp a critical understanding of social theory in the modern world.

In Intersectionality as Critical Social Theory Patricia Hill Collins offers a set of analytical tools for those wishing to develop intersectionality's capability to theorize social inequality in ways that would facilitate social change. While intersectionality helps shed light on contemporary social issues, Collins notes that it has yet to reach its full potential as a critical social theory. She

contends that for intersectionality to fully realize its power, its practitioners must critically reflect on its assumptions, epistemologies, and methods. She places intersectionality in dialog with several theoretical traditions—from the Frankfurt school to black feminist thought—to sharpen its definition and foreground its singular critical purchase, thereby providing a capacious interrogation into intersectionality's potential to reshape the world.

Critical theory explained and espoused Simpson ably introduces critical social theory, the German-born intellectual movement that has spawned sharp criticisms of modernity, its use of reason, and our highly technological, bureaucratic culture. Part 1 recounts the emergence of critical social theory within the Frankfurt School of Social Research and the theological stirrings that the Frankfurt project sparked, especially in Paul Tillich. Part 2 explores Jürgen Habermas' reconception and expansion of critical social theory, especially his ideas about hermeneutics, praxis, communicative action, and civil society as the locus of prophetic social movements. Finally, in Part 3 Simpson shows how Christian theology employs critical social theory for the tasks of prophetic reason in a global civil society. Simpson's work is at once a programmatic introduction and a creative theological proposal for public theology.

With his insightful and wide-ranging theory of recognition, Axel Honneth has decisively reshaped the Frankfurt School tradition of critical social theory. Combining insights from philosophy, sociology, psychology, history, political economy, and cultural critique, Honneth's work proposes nothing less than an account of the moral infrastructure of human sociality and its relation to the perils and promise of contemporary social life. This book provides an accessible overview of Honneth's main contributions across a variety of fields, assessing the strengths and weaknesses of his thought. Christopher Zurn clearly explains Honneth's multi-faceted theory of recognition and its relation to diverse topics: individual identity, morality, activist movements, progress, social pathologies, capitalism, justice, freedom, and critique. In so doing, he places Honneth's theory in a broad intellectual context, encompassing classic social theorists such as Kant, Hegel, Marx, Freud, Dewey, Adorno and Habermas, as well as contemporary trends in social theory and political philosophy. Treating the full range of Honneth's corpus, including his major new work on social freedom and democratic ethical life, this book is the most up-to-date guide available. Axel Honneth will be invaluable to students and scholars working across the humanities and social sciences, as well as anyone seeking a clear guide to the work of one of

Critical theory has left an indelible mark on postwar social thought. But what are the relations between critical theory and 'the cultural turn'? This text demonstrates the origins of critical theory in the Marxian analysis of the capitalist mode of production and Freudian psychoanalysis.

These essays, written in the 1930s and 1940s, represent a first selection in English from the major work of the founder of the famous Institute for Social Research in Frankfurt. Horkheimer's writings are essential to an understanding of the intellectual background of the New Left and the too much current social-philosophical thought, including the work of Herbert Marcuse. Apart from their historical significance and even from their scholarly eminence, these essays contain an immediate relevance only now becoming fully recognized.

Highlights the problematic nature of mainstream perspectives, and the growing need to reaffirm how the specific kind of critique the early Frankfurt School theorists advocated is not less, but far more important today. This book also includes chapters that offer a broad and diverse look at social science and critical theory.

In this major new work, Thompson develops an original account of ideology and relates it to the analysis of culture and mass communication in modern Societies. Thompson offers a concise and critical appraisal of major contributions to the theory of ideology, from Marx and Mannheim, to Horkheimer, Adorno and Habermas. He argues that these thinkers - and social and political theorists more generally - have failed to deal adequately with the nature of mass communication and its role in the modern world. In order to overcome this deficiency, Thompson undertakes a wide-ranging analysis of the development of mass communication, outlining a distinctive social theory of the mass media and their impact.
