What is an orc? An orc is an 18 stone fighting machine, made of muscle, hide, talon and tusk, with a villainous disposition and a mean sense of humour. And, of course, an orc is a poor dumb grunt - the much abused foot soldier of the Evil Horde of Darkness. The usual last battle of Good against Evil is about to begin. Orc Captain Ashnak and his war-band know exactly what they can expect. The forces of Light are outnumbered, full of headstrong heroes devoid of tactics - but the Light's still going to win. Orcs - the sword fodder in the front line - will die by the thousands. Life's a bitch.

For the beautiful young woman Ash, life has always been arquebuses and artillery, swords and armour and the true horrors of hand-to-hand combat. War is her job. It is a nameless city somewhere between past and future, a mythic realm at the "heart of the world," where wicked Rat Lords have reduced all humankind to slaves, and god-daemons make the decision to end all existence. This energizes a compelling quest for survival, and prompts the powerful White Crow to order an uprising against this chaotic strike that threatens them all. Among those who respond to her are the defiant Prince Lucas of Candover, a student at the University of Crime, and no mans's slave; and Zari, the young Katayan woman who is destined to become the living Memory of all that follows. And others rally to join them in one final desperate revolt, hoping to create a magic powerful enough to reshape the very nature of how they live.

A finalist for the Los Angeles Times Science & Technology Book Prize 'The most entertaining writer in science' - The Times, Books of the Year War. Mention it and most of us think of history, of conflicts on foreign soil, of heroism and compromise, of strategy and weapons. But there's a whole other side to the gruesome business of the battlefield. In Grunt, the inimitable Mary Roach explores the science of keeping human beings intact, awake, sane, uninfected and uninfested in the bizarre and extreme circumstances of war. Setting about her task with infectious enthusiasm, she sniffs World War II stink bombs, tests earplugs in a simulated war zone and burns the midnight oil with the crew of a nuclear submarine. Speaking to the scientists and the soldiers, she learns about everything from life-changing medical procedures to innovations as esoteric as firing dead chickens at fighter jets. Engrossing, insightful and laugh-out-loud funny, this is an irresistible ride to the wilder shores of modern military life.

The distant world of Orthe is littered with spectacular remnants of the Golden Empire, an ancient and technologically advanced civilisation extinct for two thousand years. Now their Orthean descendants have turned away from the technology which nearly destroyed them, and from their ancestors, the Golden Witchbreed. Then Earth envoy Lynne de Lisle Christie arrives and, all too quickly, finds herself the victim of intrigue and conspiracy, embroiled in a conflict that threatens to explode into war \u00e6 and which puts her own life in deadly peril . . .

The White Crow, one-time Soldier-Scholar of the Invisible College and a practioner of Hermetic science and magic, and Baltazar Casaubon, architect and lover, a man not too particular about his personal hygiene, are two of Mary Gentle's finest creations. The worlds they stride across range from the Renaissance city where aristocratic rats rule the human servant class, to a near-future London where chaos is come again. They are two of the most powerful players in the games of magic and politics, and the most colourful. This volume brings together three brilliantly imaginative, powerful and disturbing tales - Rats and Gargoyles, The Architecture of Desire and Left to His Own Devices - and the linked short fiction and confirms Mary Gentle as one of the foremost writers of dark and visionary fantasy.
