Homemade Explosives: Awareness, Recognition, and Response (HME) was developed by the New Mexico Institute of Mining and Technology (New Mexico Tech) and provides first responders with the knowledge, skills, and abilities to effectively prevent, interdict, and respond to an imminent threat caused by HME laboratories and producers. focus on the various components and manufacturing processes of homemade explosives, response considerations when encountering homemade explosives, ...

A guide on procedures, administration, and equipment, Bombs, IEDs, and Explosives: Identification, Investigation, and Disposal Techniques introduces concepts, basic knowledge, and necessary skill sets for bomb technicians. It covers topics such as training resources, bomb threat and incident response, legal aspects of bomb disposal, explosives and

This insider's manual is used by a federal agency to train its bomb disposal agents in the recognition, composition and handling of improvised explosives and the various fuzes used to set them off. Provides examples of actual terrorist devices discovered and disarmed by EOD personnel. For information purposes only.

You don't need to be a trained soldier to fully appreciate this edition of the U.S. Army Improvised Munitions Handbook (TM 31-210). Originally created for soldiers in guerilla warfare situations, this handbook demonstrates the techniques for constructing weapons that are highly effective in the most harrowing of circumstances. Straightforward and incredibly user-friendly, it provides insightful information and step-by-step instructions on how to assemble weapons and explosives from common and readily available materials. Over 600 illustrations complement elaborate explanations of how to improvise any number of munitions from easily accessible resources. Whether you're a highly trained soldier or simply a civilian looking to be prepared, the U.S. Army Improvised Munitions Handbook is an invaluable addition to your library.

This comprehensive guide provides the training materials for Traffic Incident Management (TIM) Responders four (4) hour course with three main goals including Responder safety; Safe, quick clearance; and Prompt, reliable, interoperable communications This Train-the Trainer- Guide is aimed at all responder disciplines including law enforcement, fire and rescue, emergency medical services (EMS), towing operators and recovery units, highway/transportation agencies at the Federal and State levels, and Communication centers to include 9-1-1 and transportation management centers (TMCs). Each lesson includes an objective plus offers black and white photos to easily identify with the program lessons that follow to address the incidents as a method to train the students. Emergency management personnel, fire and rescue teams, and law enforcement may be interested in this guide as a desk reference. Additionally, students hoping to become certified within these employment areas may want to familiarize their knowledge with these vital lessons prior to beginning on-the-job duties. The Analysis of Explosives surveys the principles of the various analytical methods, describes how these methods are used for the analysis of explosives, and reviews the major analytical work carried out in this field. Organized into 15 chapters, this book begins with the classification of explosives. Subsequent chapters discuss the different methods for the analysis of explosives. The detection and identification of explosive residues and hidden explosives are also explained. This monograph will be useful as a reference book for chemists in analytical and forensic laboratories, as well as a textbook for graduate students in analytical chemistry and forensic sciences.

The goal of this book is to help train hazmat response teams and other responders in disaster training, techniques, and planning.The book will also help define and sharpen training plans and assumptions. Focusing on lessons learned from real-world experiences during actual disasters, the book will help to establish a well-trained professional 1st responder, individuals, and teams. Such lessons are emphasized so that planners and responders learn to anticipate how their community is likely to react under real disaster conditions, and plan accordingly.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
