Host Access Class Library - IBM - United States

Its name in the registry is PCOMM.autECLConnList. The autECLConnList object contains a collection of information about connections to a host. Each element of the collection represents a single connection (emulator window). A connection in this list may be in any state (for example, stopped or disconnected). All started connections appear in this list. The list element contains the state of the ...

Host Access Class Library - IBM - United States

Introduction IBM Personal Communications provides an emulator interface to communicate with IBM Mainframe/AS400/VT sessions. This is used for reading & updating host data and interfacing host with other applications. Performing manual tasks on emulator screen increases in transaction and becomes repetitive, this over a long term would have issues:

IBM PCOMM 12.0 now seamlessly supports file transfer to MVS file systems, apart from existing support for hierarchical file systems (HFS). Note: File transfer to an MVS file system might result in change to the file name as per MVS naming conventions. This is applicable to both MVS sequential data set (also called physical sequential/PS) and MVS partitioned data set (PDS). Serviceability ...

5724-I20 IBM Host Access Client Package 14.0

Using PCOMM Ver 6.0. The goal is to copy several CICS screens as a script (or macro) runs. 24x80 green-screen stuff. First step is to create or record the macro or script. The problem is that PCOMM's Edit-Copy and Edit-Append are not supported under PCOMM's Start Recording, either as a macro or VBScript.
