~~Introduction
To Pattern Recognition A~~
Pattern recognition is the process of recognizing patterns by using machine learning algorithm. Pattern recognition can be defined as the classification of data based on knowledge already gained or on statistical information extracted from patterns and/or their representation. One of the important aspects of the pattern recognition is its application potential.

~~Pattern Recognition +
Approach A
Introduction — GeeksforGeeks~~

Pattern recognition is a process of finding regularities and similarities in data using machine learning data. Now, these similarities can be found based on statistical analysis, historical data, or the already gained knowledge by the machine itself. A pattern is a regularity in the world or in abstract notions.

What is Pattern Recognition?
Pattern recognition is the method of identifying patterns by using machine learning algorithm. It is the process which can detect different categories and get information about particular data. Voice recognition,

~~Introduction to pattern recognition~~ Approach A

Pattern recognition and classification is the act of taking in raw data and using a set of properties and features take an action on the data. As humans, our brains do this sort of classification everyday and every minute of our lives, from recognizing faces to unique sounds and voices. This cognitive task has been very crucial for our survival.

~~Introduction To Pattern Recognition and Classification — Rhea~~

Statistical pattern recognition is a term used

Introduction To Pattern

to cover all stages of an investigation from problem formulation and data collection through to discrimination and classification, assessment of results and interpretation. Some of the basic terminology is introduced and two complementary approaches to discrimination described.

~~Introduction to statistical pattern recognition~~

In psychology and cognitive neuroscience, pattern recognition describes cognitive process that matches information from a stimulus with information retrieved from memory.
