Summarized the heavy metal pollution caused by natural and human activities. The natural causes include the migration and redistribution of soil debris and the hydraulic migration of soil parent rock with high background value under the action of wind; human factors include mining, abandoned mining areas, fertilizer and pesticide application, and sewage irrigation.

Natural and Human Factors Affect the Distribution of Soil ...

Many studies have documented different natural sources of heavy metals. Under different and certain environmental conditions, natural emissions of heavy metals occur. Such emissions include volcanic eruptions, sea-salt sprays, forest fires, rock weathering, biogenic sources and wind-borne soil particles.

Environmental Contamination by Heavy Metals | IntechOpen

Air and water pollution are the two areas where nature contributes its own forms of pollution, either by introducing gases and particulate matter into the atmosphere, or by introducing heavy metals and natural toxins into the water.
