This new resource instructs students and clinicians in splint fabrication techniques and related interventions for the upper extremity, and highlights anatomical and biomechanical principles specifically related to splints. It defines the purpose of splints, and offers associated indications and precautions. Intelligently organized and generously illustrated, each chapter includes clinical hints, and a specific section dedicated to splinting for a spectrum of diagnoses and populations. Indexes provide a user-friendly cross-reference that lists splints by name and splints by diagnosis to assist the reader in usage of the manual. Also provides insight into the clinical experience with emphasis on containing cost while maximizing time efficiency. Professional hands-on splinting workshops are going on for all levels of experience--visit cj-

during labs, and in clinical practice for both occupational and physical therapists. Additionally, it is a great reference for those studying to become a Certified Hand Therapist (CHT). *Orthotic Intervention for the Hand and Upper Extremity: Splinting Principles and Process* superbly highlights anatomical and mechanical principles; discusses associated indications and precautions; and promotes clinical reasoning skills by presenting various patient examples, therefore allowing you to confidently utilize techniques in clinical practice. This updated third edition is divided into the following sections: fundamentals necessary for successful orthotic fabrication, additional intervention methods, and orthoses for specific diagnoses and patient populations. Now with a larger format for more generous pattern appreciation, as well as incorporated and revised evidence-based content from an expanded list of contributing authors, it remains the go-to resource for every level of usage. New Chapters on Relative Motion Orthoses, Prosthetics, Orficast, Delta-Cast, and Tendon & Nerve Transfers. Fabrication Process Manual is now a separate supplemental resource including comprehensive step-by-step directions for more than 60 orthoses in addition to dozens more orthosis options included within the Clinical and Expert Pearls. Full-color photographs of actual patients provide hundreds of new clinical examples demonstrating the direct link to clinical practice. Larger Format of textbook allowing for larger images and additional content. Addition of Expert Pearls generously shared by dozens of hand therapy experts from around the world including unique orthotic ideas, tips, and material usage. Field Notes written by chosen clinical experts highlighting a unique perspective on that chapter's content. FAQs list common questions therapists have related to orthotic fabrication and other intervention strategies for a specific patient population. Respected Surgeons contributed their thoughts highlighting the important collaborative relationship between a surgeon and hand therapist. Lippincott(R) Connect features: Lifetime access to the digital version of the book with the

and on the CD demonstrate important concepts. Case studies in the common diagnoses chapters demonstrate the use of clinical reasoning and highlight the "human" side of each client encounter. Clinical pearls and precautions share advice from the author and contributors, learned from years of clinical experience. Describes the role of the therapy assistant with the client, showing how the therapy assistant may be included in the therapy process. Glossary includes key terms from the text, offering easy access to definitions of key terms. CD provides samples of hand therapy exercises and clinical forms that may be used with clients.

"Rehabilitation of the hand is a challenge undertaken by therapists working with patients whose upper limbs have been affected by disease or trauma. Restoration of optimum hand function is an objective of therapeutic intervention, and hand splinting is an integral part of this intervention."--Cover.

Emphasizes the development of clinical reasoning skills, describing the components of the evaluation process and addressing how to decide what to evaluate.
