Use the Gizmo to set up three different scenarios. For each scenario, change the Index of refraction 1, Index of refraction 2, and Angle of incidence. Record the values you choose in the first three columns of the table below. Then, use the protractor tool to measure and record the angle of refraction.

Refraction Gizmo

Answer Key

Check that w is 2.0 and θ is 0° . Introduction:

When light passes from a vacuum into a medium such as glass, it slows down. The index of refraction (n) is equal to the ratio of the speed of light in a vacuum to the speed of light in a medium. The index of
