Chapters consider topics such as: vocal strategies and development using song, rhyme and movement integrating instrumental accompaniments observation and assessment planning and delivery resources for music making. This book is essential reading for all early years practitioners looking to improve their musical understanding and plan successful musical activities with young children.

The new edition of The Child as Musician: A Handbook of Musical Development celebrates the richness and diversity of the many different ways in which children can engage in and interact with music. It presents theory - both cutting edge and classic - in an accessible way for readers by surveying research concerned with the development and acquisition of musical skills. The focus is on musical development from conception to late adolescences, although the bulk of the coverage concentrates on the period when children are able to begin formal music instruction (from around age 3) until the final year of formal schooling (around age 18). There are many conceptions of how musical development might take place, just as there are for other disciplines and areas of human potential. Consequently, the publication highlights the diversity in current literature dealing with how we think about and conceptualise children's musical development. Each of the authors has searched for a better and more effective way to explain in their own words and according to their own perspective, the remarkable ways in which children engage with music. In the field of educational psychology there are a number of publications that survey the issues surrounding child and adolescent development. Some of the more innovative present research and theories, and their educational implications, in a style that stresses the fundamental interplay among the biological, environmental, social and cultural influences at each stage of a child's development. Until now, no similar overview has existed for child and adolescent development in the field of music. The Child as Musician addresses this imbalance, and is essential for those in the fields of child development, music education, and music cognition.

When you think of arts therapy, you don't often associate the practice with profit; however, ethical economic models are essential in allowing clients the most access to arts therapy services. Art therapists don't generally have formal training in economics, which can be challenging when developing their professional services. This book offers the fundamentals of micro and macro economics that apply to creating a sustainable and ethical business model that supports the development of the arts therapies profession worldwide. Through economic theory and international case studies, the authors consider the business side of therapeutic arts service with recommendations for developing an ethical and sustainable practice. With key insights and informative examples, this book will serve as a guide for small business owners looking to develop their arts therapy practice.

Why do some children take up music, while others don't? Why do some excel, while others give up? 'Music in our lives' takes an innovative approach to answering these questions. It is drawn from a research project that spanned fourteen years, and closely followed the lives of over 150 children learning music - with enlightening conclusions.

Julie Cigman uses a vast range of personal vignettes to explain best practice when encouraging boys to write. The theory is brought to life with these recollections, making this a very informative and enjoyable book to read. The ideas for working together with boys are beautifully simple and are tried and tested. This book would support both experienced practitioners and those who are just starting out, because it is so accessible and uses examples in such a delightful way - Kathy Brodie, Early Years Consultant, UKEarly Years Consultant, UK. Julie Cigman has given us a practical and principled way forward in supporting boys' writing. This book is shot through with rich examples of effective practice and deserves to be widely used. Young boys' writing is bought alive for us in these pages, and the groundedness in practice demonstrates how boys' achievement in writing can be appropriately supported from an early age. This is a book for everyone interested in promoting early literacy development. An excellent read and a practical compendium -Professor Cathy Nutbrown, School of Education, The University of Sheffield. How do we give young children a ' writers ' voice ' and allow them to become creative and inspired writers? Supporting Boys ' Writing in the Early Years shows you how you can help boys to become confident and capable writers by supporting them to write in ways that make sense to them on the move, outside and inside, in dens, in bushes, in mud, or sprawled on the floor dressed as superheroes. Drawing on four boys writing projects involving over 80 practitioners, the book reveals that a playful, child-centred approach can allow boys and girls to develop a writers ' voice and raise attainment in writing as well as enhancing all aspects of young children ' s development. With a strong focus on observation-led assessment and planning, the book is full of practical ideas to improve the writing environment and provide writing opportunities that will be enjoyable and motivating for children. Featuring a wide range of case studies, it covers: the stages that children move through in learning to write; how you can change and develop your learning environments to give children inspiring resources and opportunities to write; helping children to find a purpose to write through their play; practical ways to create a partnership with parents that builds on their strengths as educators at home. This book will help you to create a truly enabling environment for writing and is essential reading for all those that want the children in their setting to become confident, motivated and creative writers.

Why is it that, when children play, some behave like butterflies, flitting around among the flowers of the activities on offer, landing for a moment before moving on to the next attractive flower (activity) while others behave with the single minded concentration of bees? As children grow and learn, they acquire skills through play and practical activities. This recently acquired learning is tenuous and is secured through practice, repeating the skills in different contexts, with different people. Only then will learning be 'hard wired' for life. It is now evident that where children are able to select resources, play companions and activities for themselves, they can practise emerging skills and concepts by selecting the resources they need and using them in ways which are unique to them. This book, written by a group of experts in early years practice, explores the place and purpose of child-initiated learning in high quality early years practice. Child-initiated learning is a key feature of the Early Years Foundation Stage.

This comprehensive book describes well-defined models of music therapy for working with families in different clinical areas, ranging from families with special needs children or dying family members through to families in psychiatric or paediatric hospital settings. International contributors explain the theoretical background and practice of their specific approach, including an overview of research and illustrative case examples. Particular emphasis is placed on connecting theory and clinical practice and on discussing the challenges and relevance of each model. This practical and theoretically anchored book will prove valuable for music therapists, students and researchers in the fast developing field of music therapy with families.
