*Your Heart & Circulatory System (for Kids) - Nemours ...*

Your heart is roughly the size of a fist and sits in the middle of your chest, slightly to the left. It's the muscle at the centre of your circulation system, pumping blood around your body as your heart beats. This blood sends oxygen and nutrients to all parts of your body, and carries away unwanted carbon dioxide and waste products.

The heart is like a big pump made of muscles, and it constantly pumps blood throughout our bodies every minute of every day. These movements are called 'involuntary' which means you don't actually have to think about making your heart beat; your brain does the work for you and passes on the message.

### *The Heart For Kids | Cool Kid Facts*

The heart is the organ that helps supply blood and oxygen to all parts of the body. It is divided by a partition (or septum) into two halves. The halves are, in turn, divided into four chambers. The heart is situated
