The Voice of Silence is by an Irishwoman who has had an extraordinary life. Oonagh Shanley-Toffolo was brought up in 1930s rural Ireland where her father initiated her into the healing arts. At the age of 16, she entered a convent where she trained as a nurse, and was sent to India to look after the elderly (and knew Mother Teresa). Here, she felt it was the young, rather than the old, who needed more help and so she left her order and trained in midwifery. Later, in Paris, she was asked to nurse the Duke of Windsor just before he died - and many years later was introduced to Princess Diana and became her weekly confidante. In between, were bouts of serious illness, studying acupuncture in China - and being photographed by Snowdon. The Voice of Silence is the life story of a very unusual woman who has learned far more than most from all the remarkable things that have happened to her. It is also the author's thoughts on healing, spirituality and love - and how closely the three are intertwined. Full of feeling, poetic vision and insight, this book cannot fail to touch the heart of the reader, and inspire.

The poetry of the First World War has determined our perception of the war itself. This volume features poetry drawn from old newspapers and journals, trench and hospital magazines, individual volumes of verse, gift books, postcards, and a manuscript magazine put together by conscientious objectors.

Shame and shame reactions are two of the most delicate and difficult issues of psychotherapy and are among the most likely to defy our usual dynamic, systemic, and behavioral theories. In this groundbreaking new collection, The Voice of Shame, thirteen distinguished authors show how use of the Gestalt model of self and relationship can clarify the dynamics of shame and lead us to fresh approaches and methods in this challenging terrain. This model shows how shame issues become pivotal in therapeutic and other relationships and how healing shame is the key to transformational change. The contributors show how new perspectives on shame gained in no particular area transfer and generalize to other areas and settings. In so doing, they transform our fundamental understanding of psychotherapy itself. Grounded in the most recent research on the dynamics and experience of shame, this book is a practical guide for all psychotherapists, psychologists, clinicians, and others interested in self, psychotherapy, and relationship. This book contains powerful new insights for the therapist on a full-range of topics from intimacy in couples to fathering to politics to child development to gender issues to negative therapeutic reactions. Filled with anecdotes and case examples as well as practical strategies, The Voice of Shame will transform your ideas about the role of shame in relationships - and about the potential of the Gestalt model to clarify and contextualize other approaches.

The aim of this book is to highlight and begin to give 'voice' to some of the notable 'silences' evident in recent years in the study of contentious politics. The seven co-authors take up seven specific topics in the volume: the relationship between emotions and contention; temporality in the study of contention; the spatial dimensions of contention; leadership in contention; the role of threat in contention; religion and contention; and contention in the context of demographic and life-course processes. The seven spent three years involved in an ongoing project designed to take stock, and attempt a partial synthesis, of various literatures that have grown up around the study of non-routine or contentious politics. As such, it is likely to be viewed as a groundbreaking volume that not only undermines conventional disciplinary understanding of contentious politics, but also lays out a number of provocative new research agendas.
