Literacy lies at the heart of student understanding and achievement. Yet too many educators mistakenly assume that the reading, writing, speaking, and thinking skills that students developed in elementary school are sufficient for the sophisticated learning tasks they face in middle and high school. The result? Disappointing test scores, high dropout rates, and students unprepared for higher education, citizenship, and the world of work. Taking Action on Adolescent Literacy: An Implementation Guide for School Leaders presents a structured approach to using literacy as a lever for overall school improvement. Literacy instruction is not an "add-on," authors Judith L. Irvin, Julie Meltzer, and Melinda Dukes insist, it's an ongoing essential. All adolescent students, no matter what their level of achievement, can benefit from direct instruction in reading, writing, speaking, and thinking. And all secondary school leaders can improve students' literacy and learning by following the five action steps outlined in this book: (1) develop and implement a literacy action plan, (2) support teachers to improve literacy instruction, (3) use data to make curricular decisions, (4) build capacity for shared leadership, and (5) creatively allocate resources to support the literacy plan. The book also offers strategies to help educators integrate literacy and learning across the content areas, provide targeted interventions for students who are struggling the most, and develop a supportive school environment that involves parents, community members, and district leaders. Practical tools, helpful resources, and vignettes based on the authors' extensive work in school districts nationwide make this an indispensable guide for principals, central office administrators, literacy coaches, department chairs, and other school leaders committed to helping students succeed.

The goal of teaching writing is to create independent and self-motivated writers. When students write more often, they become better at writing. They acquire habits, skills, and strategies that enable them to learn more about the craft of writing. Yet they require the guidance and support of a more knowledgeable person who understands the writing process, the changes over time in writing development, and specific techniques and procedures for teaching writing. In Scaffolding Young Writers: A Writers' Workshop Approach, Linda J. Dorn and Carla Soffos present a clear road map for implementing writers' workshop in the primary grades. Adopting an apprenticeship approach, the authors show how explicit teaching, good models, clear demonstrations, established routines, assisted teaching followed by independent practice, and self-regulated learning are all fundamental in establishing a successful writers' workshop. There is a detailed chapter on organizing for writers' workshop, including materials, components, routines, and procedures. Other chapters provide explicit guidelines for designing productive mini-lessons and student conferences. Scaffolding Young Writers also features: an overview of how children become writers; analyses of students' samples according to informal and formal writing assessments; writing checklists, benchmark behaviors, and rubrics based on national standards; examples of teaching interactions during mini-lessons and writing conferences; illustrations of completed forms and checklists with detailed descriptions, and blank reproducible forms in the appendix for classroom use. Instruction is linked with assessment throughout the book, so that all teaching interactions are grounded in what children already know and what they need to know as they develop into independent writers.

"HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as the Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps. Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

The "communication effect" is what happens when we saturate our classrooms with authentic communication, which occurs when students use language to build up ideas and do meaningful things. For starters, authentic communication deepens and increases language development, learning of content concepts and skills, rigor and engagement, empathy and understanding of others' perspectives, agency and ownership of core ideas across disciplines, and social and emotional skills for building strong relationships. And these are just the starters. With The Communication Effect, Dr. Jeff Zwiers challenges teachers in Grades 3 and up to focus less on breadth and more on depth by grounding instruction and assessment in authentic (rather than pseudo-) communication. This book provides: Ideas for cultivating classroom cultures in which authentic communication thrives Clear descriptions and examples of the three features of authentic communication: 1. building up key ideas (claims and concepts), 2. clarifying terms and supporting ideas, and 3. creating and filling information gaps Over 175 suggestions for using the three features of authentic communication to enhance twenty commonly used instructional activities across disciplines Additional examples of not-so-commonly-used activities that embody the three features Suggestions for improving four different types of teacher creativity needed to design effective lessons, activities, and assessments that maximize authentic communication Our students deserve to get the most out of each minute of each lesson. Authentic communication can help. As you read The Communication Effect and apply its ideas, you will see how much better equipped and inspired your students are to grow into the amazing and gifted people that they were meant to become.
